

PROGRAMME INFORMATION

Operate a Harvester
PLANT EQUIPMENT

PURPOSE

The purpose of this learning programme is to promote safe and proficient operation of plant equipment through applied learning in accordance with legislated criteria.

WHY DO I NEED THIS?

To help in prevent injuries, fatalities and property damage caused by untrained or poorly trained personnel as a result of ineffective or negligent operation.

TARGET AUDIENCE

Responsible learners over the age of eighteen (18) who wish to learn how to operate plant equipment safely and proficiently.

SCOPE

The qualifying learner will be able to operate plant equipment by understanding the functions of starting, shutting down and operating procedures for the machine. The qualifying learner will be capable of:

- Demonstrating knowledge of the functions of the plant equipment.
- Planning for work activities and prepare work area.
- Starting and shutting down the plant equipment.
- Operating the plant equipment.
- Transporting the plant equipment to and from site.
- Apply the recognised methods for inspecting and recording the operational fitness of all components of the plant equipment with respect to safety procedures in the workplace.
- Handle, load and store materials in accordance with industry standards environmental requirements, and with due consideration to inter alia the commodities and their properties, storage area and placement of materials.
- Achieving maximum work performance of the plant equipment and its attachments, by applying knowledge of equipment dimensions, controls, principles of operation and capacities, manufacturing specifications and circumstances in the working environment.
- Operating equipment in accordance with laid down organisational and legislative standards and procedures as well as manufacturer's guidelines.
- Access available emergency support systems and services in the case of an incident or an accident.
- Discuss and apply the regulatory framework for safe operation of the equipment.

In addition, learners will:

- Contribute to the national skills development strategy which is the key developmental interface between Learners and new competencies to be achieved.
- Master the applied competence described in this unit standard and, as a result, will contribute to the development of a professional community of plant equipment operators who are able to competently use science and technology when applying operation techniques.
- Contribute to socio-economic transformation in that learners will be able to undergo RPL-assessment and thereby receive recognition for previous learning and experience to help enhance the employability and career prospects of learners.

APPLICATION

After completing this learning programme, qualifying persons will be able to operate plant equipment and handle materials in terms of company standards, legislated criteria and best practice.

EXPECTED DELIVERY TIME

Novice Training

Five days. This applies to learners with little to no experience. Such learners must attend full training and complete a learner assignment.

Re-Certification Training

One Day. This applies to learners who are in possession of a Certificate of Competency (COC) that has either expired or is about to expire. Such learners are required to produce a recognised COC as evidence of prior learning in order to be eligible for Re-Certification training (also known as “Refresher Training”).

CERTIFICATION

A Certificate of Competency will be issued to successful Learners based on the type, make, model and capacity of the equipment the training was conducted on. A Certificate of Competency (COC) is valid for a maximum period of two years from date of issue.

ENTRANCE QUALIFICATIONS

It is assumed that learners accessing this unit standard will have demonstrated competence in:

- Communication at NQF Level 1 or equivalent.
- Mathematical Literacy at NQF Level 1 or equivalent.

It is further assumed that:

- Learners are medically fit (mentally and physically) with the learning ability and potential to become a competent operator.
- Learners have a basic sense of control mechanisms typically found on equipment i.e. steering, brake and accelerator/throttle.
- Learners possess a healthy respect for their own safety, their fellow learners’ as well as any other personnel who may be encountered during training. Learners shall each have their own Personal Protective Equipment and stationery when attending training.
